

Tata Steel drive for Carbon Reduction

Bart van der Meulen
Long Term Asset Strategy
Tata Steel in IJmuiden

Developing strategies to meet our
2050 carbon reduction targets

Energielab Waterstof Noord-Holland

13 November 2018

IJmuiden has a 100 years history of carbon based steel making through Blast Furnace route

High tech, fully integrated steel company

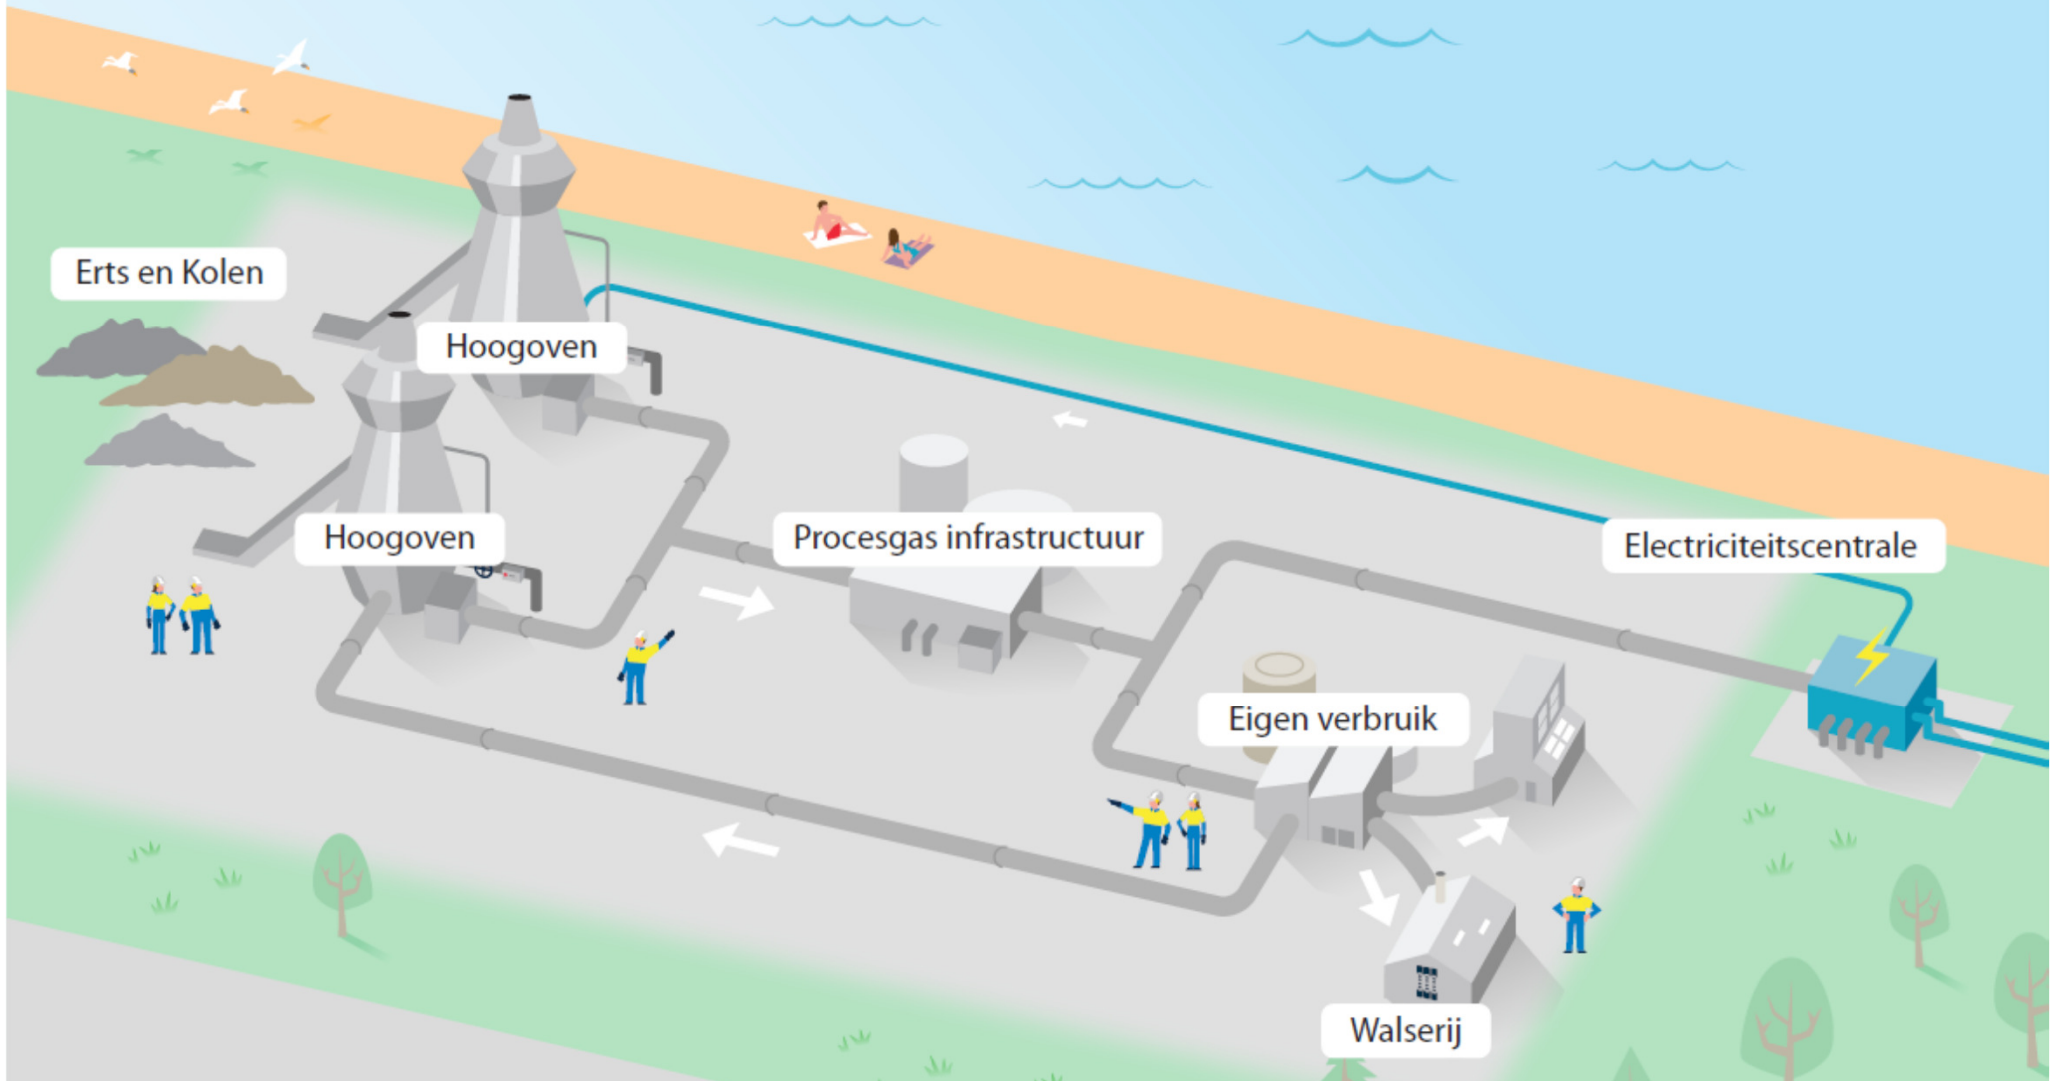

9.000 fte's, incl. 350 researchers

7,2 million ton steel per year

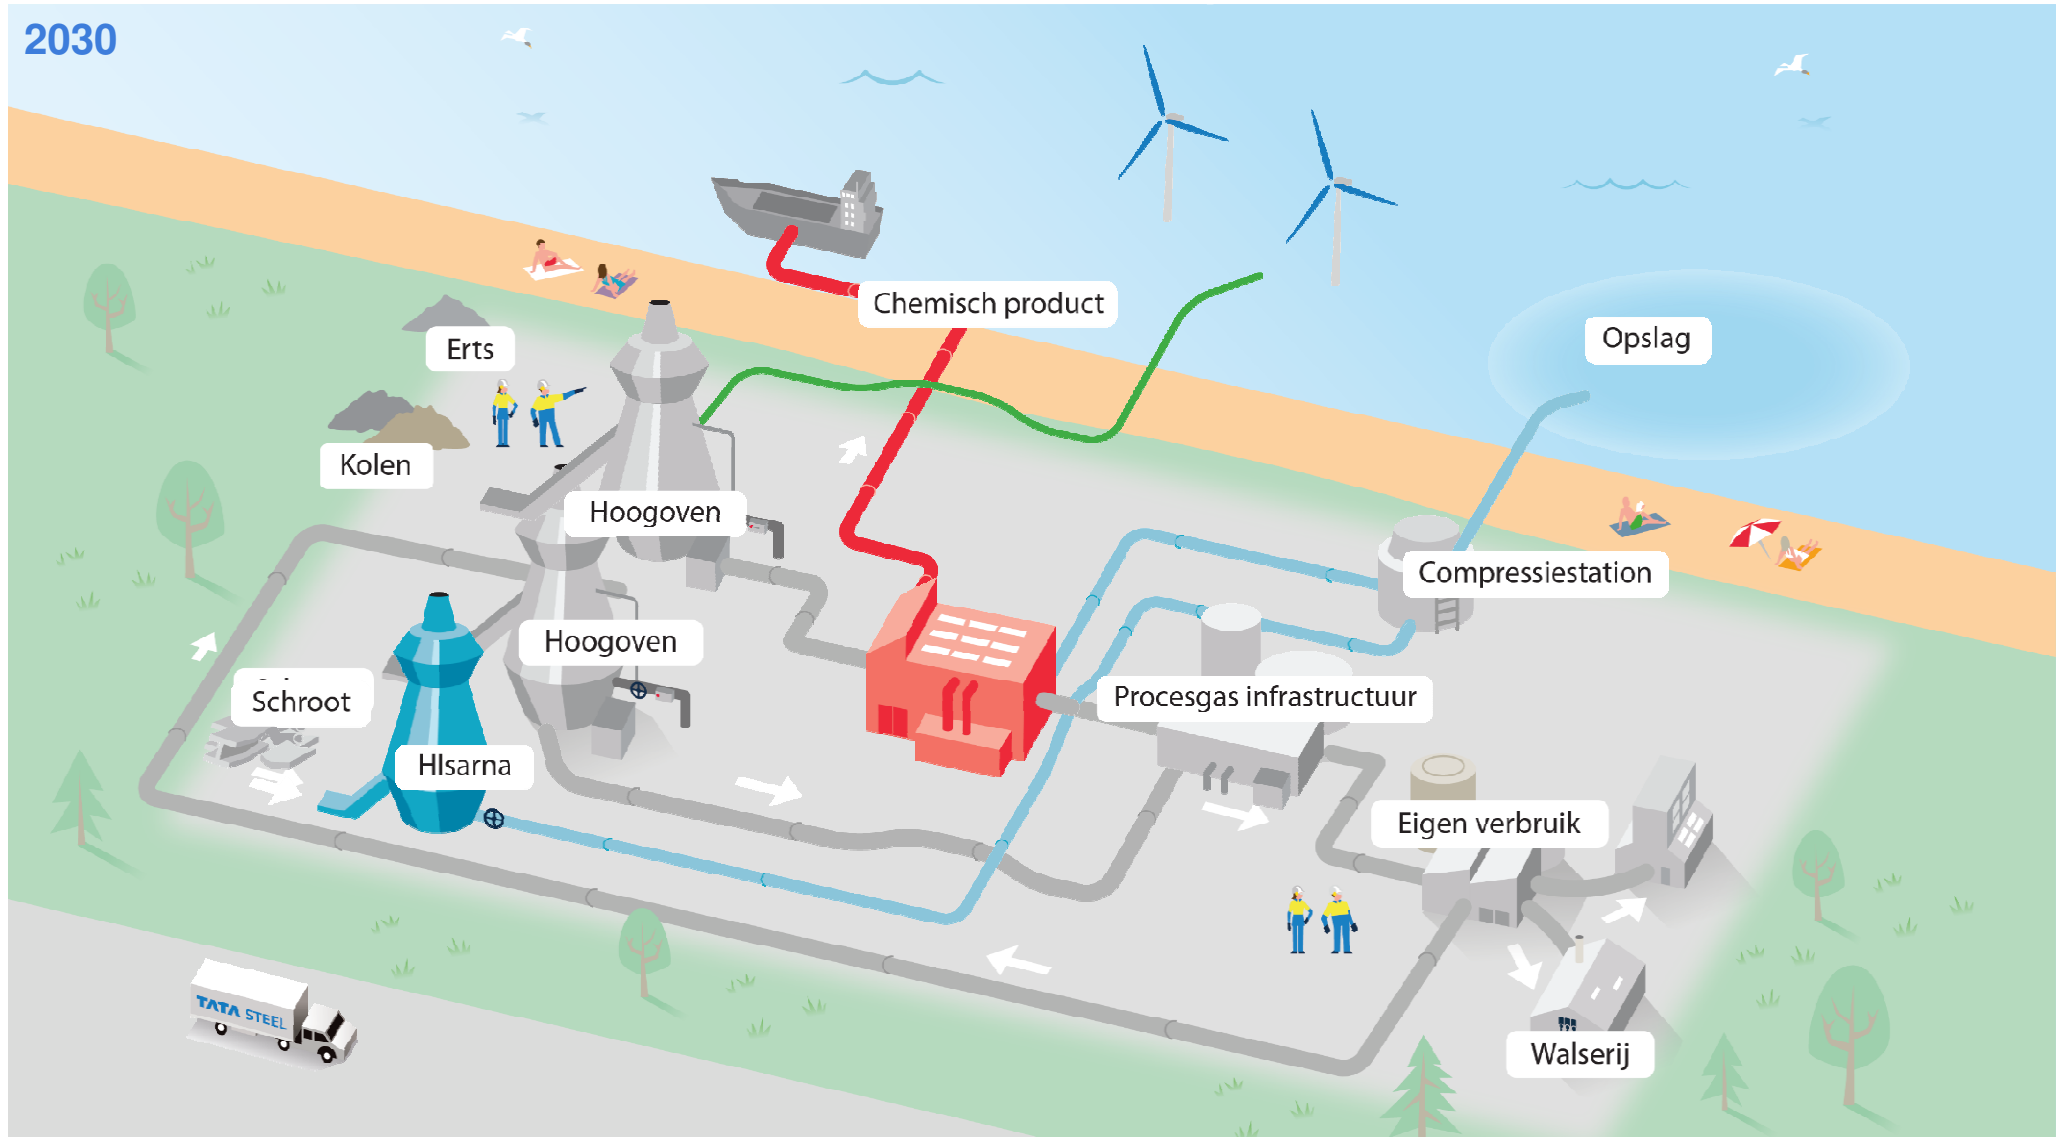

Excellent geographic position

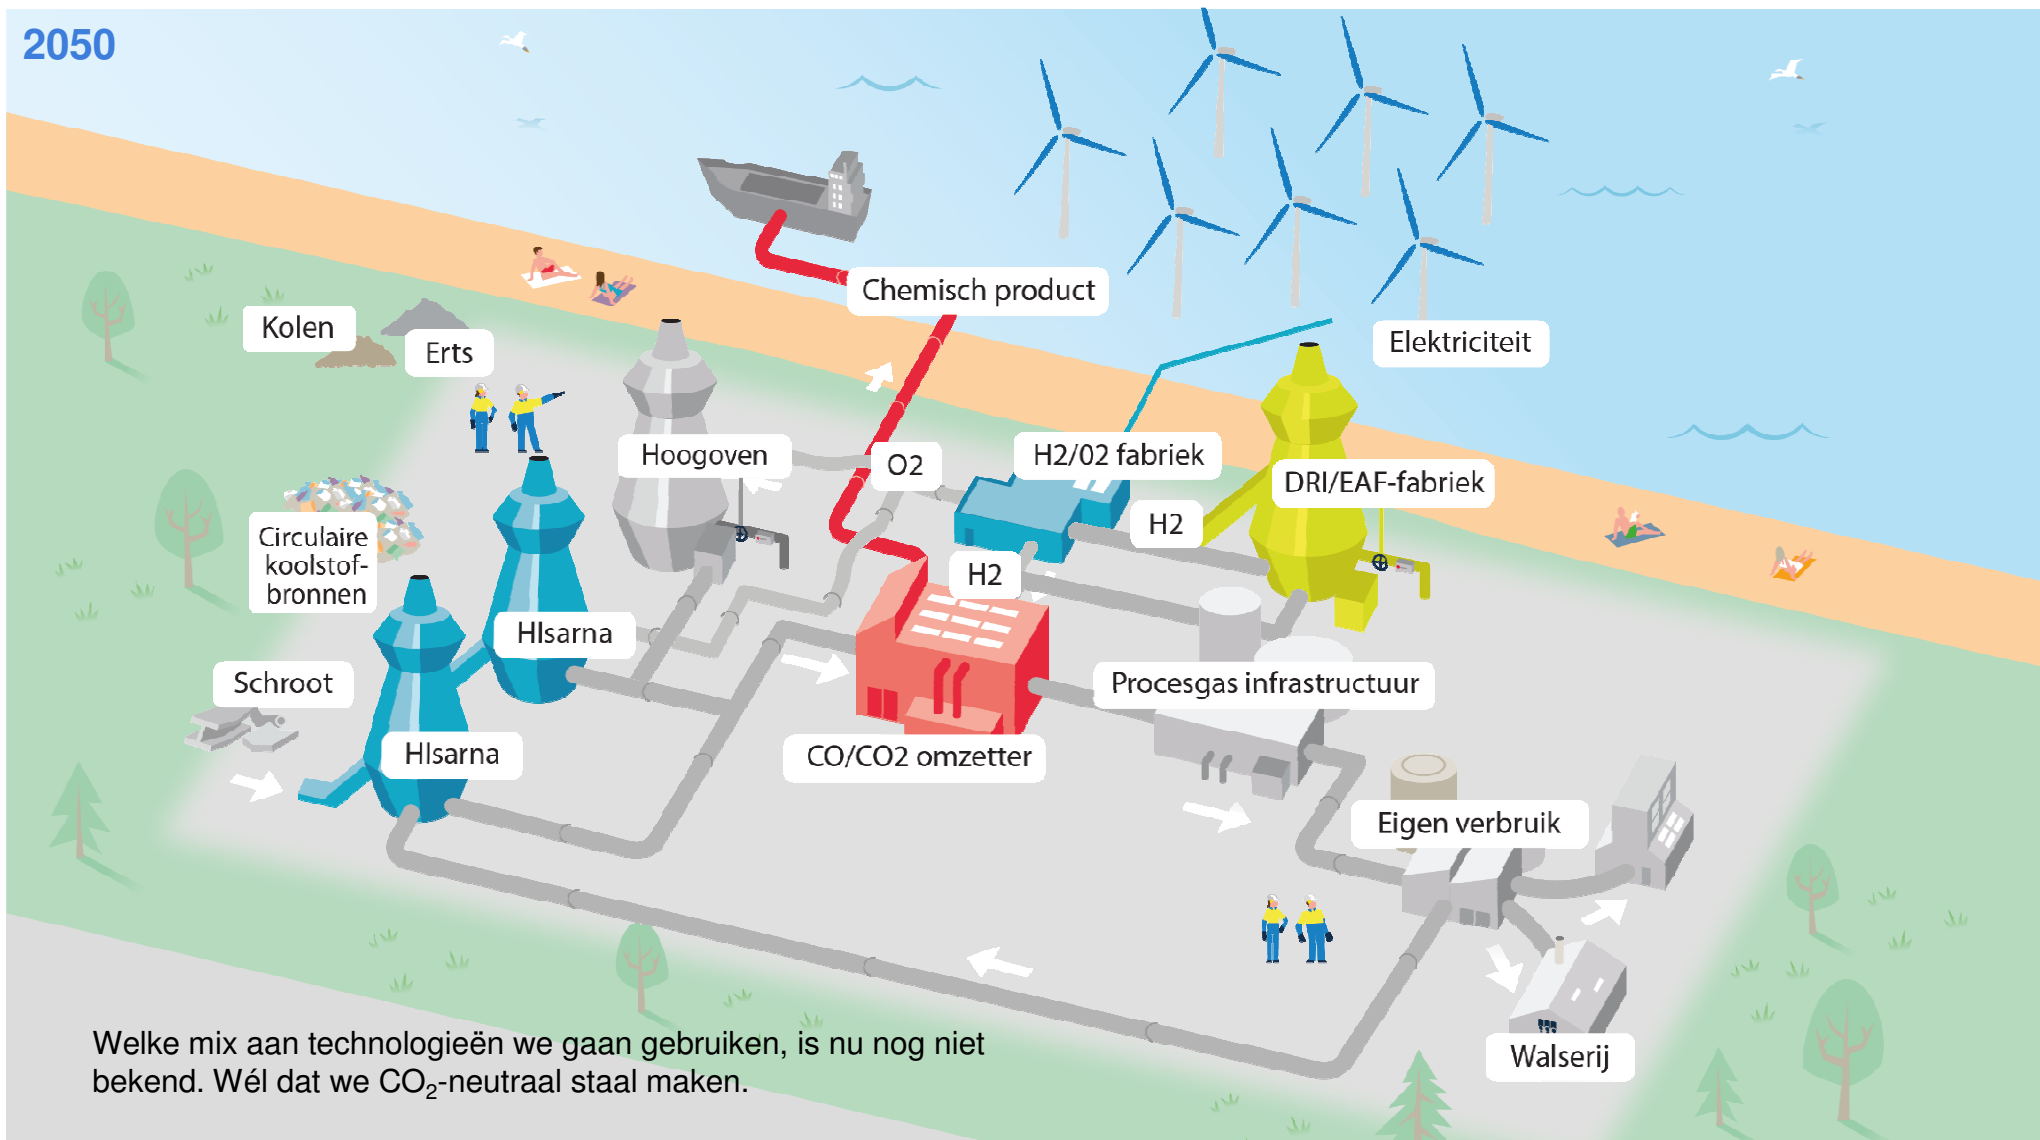

Nu

2030

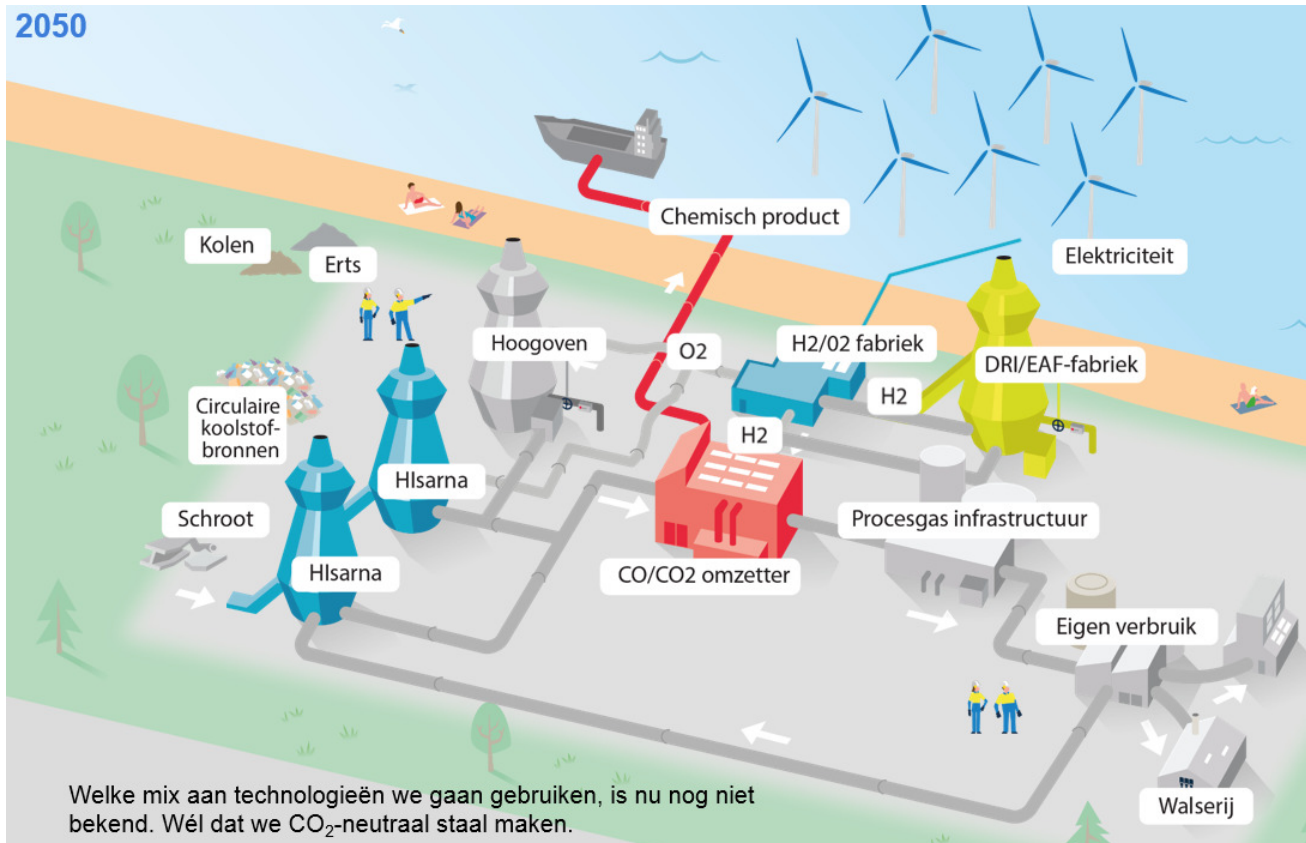

2050

Welke mix aan technologieën we gaan gebruiken, is nu nog niet bekend. Wél dat we CO₂-neutraal staal maken.

Green electricity demand will increase significantly in coming decades

TATA STEEL

Thank you!
